ColouredCrystals™

ColouredCrystals™

Add Coloured Crystals to your next exposed aggregate or polished concrete job for a new and exciting look. Choose your colours to compliment the surrounds, match your company colours for a dramatic foyer entrance or give your drive way a splash of colour. Whether inside or outdoors make a statement with colourful terrazzo finishes, exposed aggregate slabs or colour coded pathways - the possibilities are limited only by your imagination. Coloured crystals is a very cost effective idea for decorating shopping centres, office blocks, court yards and almost any area where you are considering pouring a slab.

The process is very simple - just seed the Coloured Crystals into the slab between the trowel and the bull float. (For instructions check out our website). Coloured crystals is made from 100% recycled glass, stopping these materials going in to land fill and just as importantly stopping other aggregates being mined out of the ground.

USAGE:

Depending on the look you want a light cover will use approximately 500 grams per sq metre. For the heaviest cover you will use about 2 kg per sq mt.

PURCHASE:

Coloured Crystals is available in 20kg pails. Orders over 100kg can be packaged in 20 kg bags on a small pallet. Bulk orders available in 1000kg bulk bags.

COLOUR RANGE:

Check out our extensive colour range on our web site.
(Note: metallic silver colours are not suitable for seeding in concrete.)

DELIVERY:

Delivery is available out of either Melbourne or Brisbane. Use your own transport company or we can arrange it for you. Alternatively you can pick up from our depots in Melbourne or Brisbane.
